

TrainENERGY TRANSNATIONAL MEMORANDUM OF UNDERSTANDING

This memorandum of understanding joined by all stakeholders mentioned below regards the outputs, teaching and learning activities and multiplier events emerged as a result of the Training for Energy Efficient Operations (TrainENERGY) Project funded by ERASMUS+ (www.trainenergy-project.eu).

With this memorandum of understanding, all the stakeholders agree to voluntarily take part in the outputs, teaching and learning activities and multiplier events of TrainENERGY by integrating in the co-creation scheme of the project. Each stakeholder can voluntarily drop out of this agreement at any point after their contribution has been performed. The project consortium will provide access to all outputs, teaching and learning activities and multiplier events from the project, unless they have confidential character as mentioned in the ERASMUS+ guidelines.

The co-creation among the stakeholders of this memorandum of understanding consists of the following activities:

- Voluntary participation to the peer review and ensure the quality assurance processes of TrainENERGY's outputs, teaching and learning activities and multiplier events - specifically:
 - Training needs analysis
 - Transnational knowledge transfer partnerships methodology
 - Transnational knowledge transfer partnerships pilots
 - Multiplier events & Workshops
 - Energy efficient operations curriculum
 - Virtual learning environment
 - Project image, dissemination & communication materials
 - Project sustainability provisions
- Voluntary engagement in the open-innovation and co-creation framework of the project by providing the consortium with stakeholder specific best practices and know-how to complement the consortium's expertise with applied skills and resources that will ensure the impact and usability of the project's outputs, teaching and learning activities and multiplier events.
- In case of early-stage startups or entrepreneurs in the stage of developing the business model for their venture – the provision of insights (or even small pilots) towards the applicability of TrainENERGY's outputs in terms of influencing the business model of the startup towards becoming energy efficient.

The stakeholders agree to use the mutual know-how gained through this co-creation as well as they acknowledge that no direct financial benefits (i.e. direct sale of the deliverables) can be gained.

This project has been funded with support from the European Commission. This publication [communication] reflects the views only of the author, and the Commission cannot be held responsible for any use which may be made of the information contained therein.
